

TYSON

RESEARCH CENTER

2020 Summer Seminar Series

- June 4** **David Inouye, University of Maryland Department of Biology**
[Effects of climate change on subalpine wildflowers in the Rocky Mountains, and consequences for their pollinators](#)
Host: Rachel Penczykowski
- June 11** **Rachel Nuwer, freelance journalist and author of *Poached***
[Of Tigers and Trade: Wildlife Reporting in the Time of COVID-19](#)
Host: Suzanne Loui
- June 18** **Michael Moore, Living Earth Collaborative**
[Climate drives the diversification of animal beauty](#)
Host: Kim Medley
- June 25** **Anny Chung, University of Georgia Department of Plant Biology**
[From phenomenon to mechanism: what is the role of plant-soil feedbacks in plant community dynamics?](#)
Host: Mahal Bugay
- July 2** **Samniqueka Halsey, University of Missouri School of Natural Resources**
[Understanding disease emergence patterns by combining long-term data sets and computational approaches](#)
Host: Solny Adalsteinsson
- July 9** **Megan Meuti, The Ohio State University Department of Entomology**
[The molecular regulation and ecological applications of seasonal responses in mosquitoes](#)
Host: Katie Westby
- July 16** **Andrés López-Sepulcre, WashU Department of Biology**
[Unravelling the interactions between ecology and evolution in Trinidadian guppies: the role of mesocosm experiments](#)
Host: Jonathan Myers
- July 23** **Martha Muñoz, Yale University Department of Ecology and Evolutionary Biology**
[Behavior is a Motor and a Brake for Evolution](#)
Host: Michael Moore

Seminars take place on Thursdays at 4:00 PM Central Time on the Tyson Research Center Live Stream YouTube channel:
